PLANT GROWTH REGULATOR • WATER SOLUBLE GRANULE

Benefits of INTENSIFY®

Promotes Root Growth and Faster Emergence

INTENSIFY is formulated with two active ingredients: Indolebutyric acid (IBA) and Gibberellic acid (GA3).

IBA stimulates root development, building the nutrient factory to the plant.

GA3 promotes cell division and elongation, getting the plants out of the ground faster and accelerating crop development.

Easy Mixing

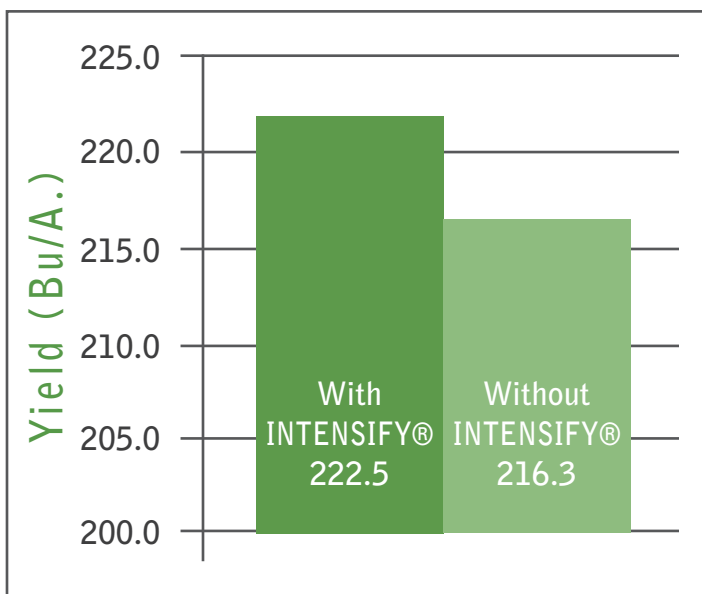

INTENSIFY readily dissolves in starter fertilizer and water, making it ideal for tank-mixing with other products.

Results You Can See

With strong roots and early emergence, INTENSIFY gets your crops off to the right start to maximize your yield potential.
